Introduction

The study visit in Greece was the last of the planned trips to participating countries. Partners from Kazakhstan, Serbia and Croatia met together to discuss the progress made in the project, the fulfillment of the project's aims and scopes as well as to further exchange ideas on agroecological issues and recent advances in agronomical practices. Additionally, project members had the chance to visit modern agro-food enterprises as well as local farms, typical of the Greek agricultural sector.

The visit was organized and hosted by the Democritus University of Thrace (P5), Department of Agricultural Development for the period 24-28 June, 2024. There were 24 participants that attended the meetings and visits (14 from Kazakhstan, 2 from Serbia, 2 from Croatia and 6 from Greece).

Study visit description

Day 1: 24/6/2024

During the first day a meeting was held among the project's coordinator, Prof. Tatjana Brankov, the representative of the Kazakh universities and Head of International Cooperation and Project Implementation Center at KenEU, Mrs. Z. Jabassova and the participating members of P5 (K. Galanopoulos, S. Koutroumbas, E. Raptou). During the meeting two main topics were discussed: (a) consultation and finalization regarding the details of the study visit and (b) the project's website status. KenEU is responsible for the project's website and DUTH is the WP7 leader, hence the purpose of the meeting was to prepare the topics and issues to be discussed at the next day's group meeting.

Day 2: 25/6/2024

Day 2 was devoted to meetings, separated into two main sessions: After the welcoming speeches, a session entitled "Agriculture, climate change and the environment: A perspective from Greece" was held, where faculty members of the Department of Agricultural Development from different laboratories presented their recent scientific work related to advances in agroecology. The president of the Hellenic Geotechnical Chamber, Thrace branch, also gave a speech on climate change and its impact on Greece's agricultural sector.

Next, followed a workshop session entitled "AGROKAZ Project Management" in which some important aspects of the project were discussed. Yuriy Tulayev, from Zarechnoye Agricultural Experimental Station, Kazakhstan presented a report on the preparatory work for dual training of students in the educational program "Agroecology".

K. Galanopoulos presented a report on the progress made regarding the project's dissemination, demonstrated an amended version of the project's website and set the major milestones for the upcoming months. Participants discussed and agreed on further actions to be taken.

Day 3: 26/6/2024

During Day 3, participants visited BIOS Agrosystems SA, located in the premises of Xanthi. Established in 1989, BIOS AGROSYSTEMS SA (*a member of 'Redestos' Eftymiadis Group of Companies, a leading company in Greece's agro-industrial complex*) focuses mainly on the production and trade in plant species varieties originating from genetic material from its own research or from its international and domestic associates. Initially the CEO of the company, Mr. E. Eftymiadis gave a presentation of the company's profile and its research and commercial activities

Co-funded by
the European Union

and then the members of AGROKAZ were given a guided tour of the company's factory and research laboratories.

Day 4: 27/6/2024

In Day 4, AGROKAZ visited companies and farms in the area of Alexandroupoli and Orestiada. The first visit was to Kyklopas Estates SA, a family owned and operated business of olives and olive oil production, that has also expanded to agrotourism. The company has 12.000 olive trees and 2.000 organically cultivated trees of the local Makri olive variety, some of which being older than 2000 years. During the guided tour of the premises, the whole cycle of production from olives to extra olive oil was explained and demonstrated.

Next, AGROKAZ visited the Silk Museum, where a detailed demonstration of the cultivation of silkworms (currently the only place in Greece still practiced) was given along with a practical demonstration of silk extraction.

Finally, AGROKAZ visited a sheep and goat farm in a remote area near Orestiada that practices circular economy: animals are fed with own-produced feedingstuff and the main product is cheese.

Day 5: 28/6/2024

During the final day, a Steering Committee meeting (project's Nr. 4) was held. The topics of the agenda were: 1. Progress in Equipment Procurement; 2. Defining the Lifelong Learning Program; 3. Implementation of the Bachelor's Study Program; 4. DUTH Proposal for More Efficient Dissemination; 5. Action Plan for the Next Six Months; 6. Any Other Business. All partners agreed on the decisions made regarding the scheduled agenda for the next period.

Before closure, AGROKAZ members discussed the findings of the study visit in Greece as well as the previous ones (Almaty, Pavlodar, Novi Sad, Osijek) and their usefulness for the program studies in agroecology.
